

Fresh, Healthy Indoor Air

No Filters. No Chemicals.

AeroTec2

Air purification the natural way- with bipolar ionization. Active directly in the indoor air, exactly where pollutants occur.

Your Benefits in Numbers

Up to 100% reduction of odors, VOCs, germs, mold, etc.

Up to 30% lower operating costs

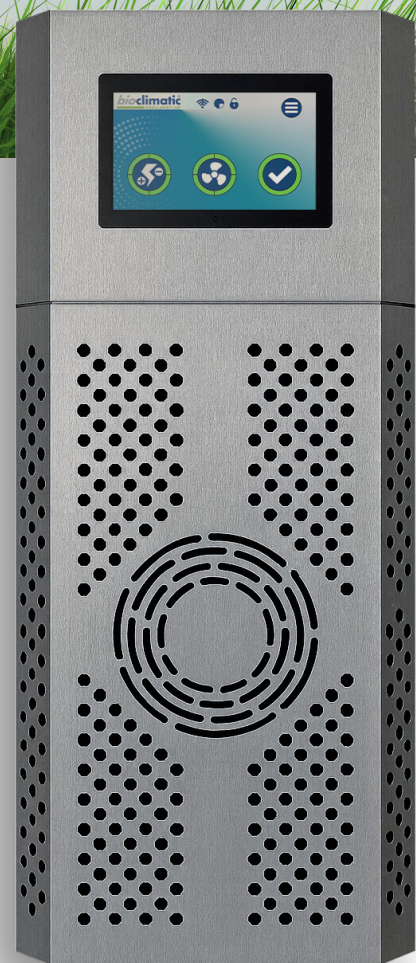

100% personal support

100% sustainable technology - no filter waste or chemicals

AeroTec2 works independently of existing ventilation systems. The ideal solution for spaces **without centralized** air systems.

Wi-Fi enabled

Built-in fan

Intuitive operation

AeroTec2 - Versatile - Easy to Install.

The compact unit purifies indoor air **continuously and reliably**. It's easy to mount, adapts to various room sizes, and runs continuously with **minimal maintenance**.

Application Examples

- Production areas
- Food industry
- Healthcare facilities
- Changing and Sanitary facilities
- Cooling and trash rooms
- Private and commercial kitchens
- Hotels and restaurants
- Odor-intensive businesses

Energy-efficient

Easy to maintain

Sustainable

Robust stainless steel housing, Energy efficient in operation.

For 110-240V, low energy consumption and high cleaning capacity for room volumes up to **180m³** the AeroTec2 ensures permanent healthy and clean air.

Plug and play: for **wall** or **ceiling** installation. On request, also available in any **RAL color**. The control is comfortable via touchscreen or remote.

AeroTec2 purifies the air through natural ionization. Using dielectric barrier discharge, charged oxygen clusters are generated that neutralize **odors, bacteria, viruses, mold, allergens**, and other microorganisms **directly** in the indoor air – without filters or chemicals.
